Load data files

    Number clusters = 187

Process each cluster

responsive MU

p values from T-test comparing BL to mean response to stim 1
    Number of responsive MU = 68

responsive MU

p values from signrank comparing SEQ & RAN response pattern

2-sided wilcoxon paired ranks test = 94

p-val for difference between conditions

preliminary results

mean amplitudes per stimulus for significant MU clusters

Average amplitude
